## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 20-27 and 30-33 are rejected under 35 U.S.C. 102(b) as being anticipated by Imazu et al.

Imazu et al shows an assembly comprising a cylindrical electrode (1), a plurality of pad strips (4) mounted on the cylindrical electrode such that the strips protrude from the outer surface of the cylindrical electrode. Figure 1. A flat panel workpiece is shown at (3). Figure 11 shows an anodic connection to the cylindrical electrode. Figure 13 shows a “donut shaped” element.

With regard to the preamble “for plating and polishing a semiconductor workpiece” statements of intended use are not given weight when considering the patentability of apparatus claims.

With regard to claims 22, 26 and 32, these claims contain functional limitations, which do not define the structural relationships of the elements in the apparatus combination.

As for claim 33, contacting the workpiece with the strips inherently includes a distance of between 0-5mm. because contacting at 0 includes surface-to-surface contact, which apparently is applicants’ intended meaning.
